Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The preliminary amendment filed 11/18/2003 has been entered.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Boss (US 4,614,290) in view of Bloser et al. (US 5,938,388). Boss discloses a wire stitching apparatus that includes a conveying arrangement (14); a wire-stitching unit (20) at an adjustable distance above the conveying arrangement (see col. 5, lines 50-60) including a binding device, an aggregate including a bender (26) and a driver (24), and a stitching carriage (23); and a wire feed (See CH 549,443 incorporated by reference). Boss discloses all the limitations of the claims, but it does not disclose an adjustable wire-cutting device, a control unit, or means for adjusting the wire-cutting device. However, Bloser discloses a wire-stitching apparatus that includes an adjustable wire-cutting device, a control unit, or means for adjusting the wire-cutting device for the purpose of stitching a stack of sheets in accordance with the thickness of the stack of sheets (see col. 3, lines 4-6). It would have been obvious for a person of ordinary skill in the art at the time of the applicant's invention to modify Boss by utilizing an adjustable wire-cutting device, a control

unit, or means for adjusting the wire-cutting device, as disclosed by Bloser, for the purpose of stitching a stack of sheets in accordance with the thickness of the stack of sheets.

Allowable Subject Matter

5. Claims 3-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
